# E. Assets, Liabilities and Net Position or Equity (continued)

# 3. Interfund Balances

Outstanding balances resulting in transactions between funds are reported as "due to/from other funds." These amounts are eliminated in the governmental and business-type activities column of the government-wide statement of net position, except that any residual balances between the governmental activities and the business-type activities are reported on the government-wide financial statements as "internal balances."

# 4. Interfund Activities

Exchange transactions between funds are reported as revenues in the seller funds and as expenditures/expenses in the purchaser funds. Flows of cash or goods from one fund to another without a requirement for repayment are reported as interfund transfers. Interfund transfers are reported as other financing sources/uses in governmental funds and after the nonoperating revenues/expenses section in proprietary funds. Repayments from funds responsible for expenditures/expenses to the funds that initially paid for them are not presented on the financial statements (i.e., they are netted).

Transfers between governmental and business-type activities on the government-wide statement of activities are reported as general revenues. Transfers between funds reported in the governmental activities column are eliminated. Transfers between funds reported in the business-type activities column are eliminated. Transfers between governmental and business-type activities are eliminated from the total column.

# 5. Inventories and Prepaid Expenses

The purchase method is used to account for inventories of materials. Under the purchase method, inventories are recorded as expenditures when purchased; however, material amounts of inventories are reported as assets of their respective funds. Reported inventories in these funds are equally offset by a fund balance reserve, which indicates the assets are unavailable for appropriation even though they are a component of reported assets.

Payments by the City in the current year to provide services occurring in the subsequent fiscal year are recorded under the purchase method. Therefore, no prepaid balance has been reflected at year end.

## 6. Capital Assets

General capital assets are those assets not specifically related to activities reported in the proprietary funds. These assets generally result from expenditures in governmental funds or contributions. The City reports these assets in the governmental activities column of the government-wide statement of net position, but does not report these assets in the governmental fund statements. Capital assets utilized by proprietary funds are reported both in the business-type column of the government-wide statement of net position and in the proprietary fund's statement of net position. General infrastructure assets (i.e., roads, bridges, right of ways, and similar items) acquired prior to July 1, 2003 are not reported.

# E. Assets, Liabilities and Net Position or Equity (continued)

# 6. Capital Assets (continued)

All capital assets are capitalized at cost (or estimated historical cost) and updated for additions and retirements during the year. Donated capital assets are recorded at their estimated fair market value as of the date received. The City maintains a capitalization threshold of \$5,000 for infrastructure, and a capitalization threshold of \$500 for other capital assets. The City's infrastructure consists of roads, bridges, storm sewers, sidewalks, traffic islands, street lights, traffic signals, and street signs. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized. Major outlays for capital assets and improvements are capitalized as projects are constructed.

All reported capital assets are depreciated except for land and construction in progress. Improvements are depreciated over the remaining useful lives of the related capital assets. Useful lives for infrastructure were estimated based on the City's historical records of necessary improvements and replacement. Depreciation is computed using the straight-line method over the following estimated useful lives:

| Asset Category                  | Estimated Useful Life |
|---------------------------------|-----------------------|
| Improvements and infrastructure | 15 to 40 years        |
| Buildings                       | 20 to 40 years        |
| Land improvements               | 15 to 50 years        |
| Machinery and equipment         | 5 to 10 years         |
| Vehicles                        | 5 to 7 years          |

# 7. Deferred Outflows/Inflows of Resources

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of fund balance that applies to future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The City has one type of item that qualifies for reporting in this category under the modified accrual basis of accounting. The governmental funds report unavailable revenues from property taxes and intergovernmental revenues as these amounts are deferred and will be recognized as inflow of resources in the period in which the amounts become available.

The City also has deferred inflows of resources and deferred outflows of resources related to the recording of changes in its net pension liability. Certain changes in the net pension liability are recognized as pension expense over time instead of all being recognized in the year of occurrence. Experience gains or losses result from periodic studies by the City's actuary which adjust the net pension liability for actual experience for certain trend information that was previously assumed, for example the assumed dates of retirement of plan members. These experience gains or losses are recorded as deferred outflows of resources or deferred inflows of resources and are amortized into pension expense over the expected remaining service lives of plan members. Changes in actuarial assumptions which adjust the net pension liability are also recorded as deferred outflows of resources or deferred inflows of resources and are amortized into pension expense over the expected remaining service lives of plan members. The difference between projected investment return on pension investments and actual return on those investments is also deferred and amortized against pension expense over a five year period. Additionally, any contributions made by the City to the pension plan before year end but subsequent to the measurement date of the City's net pension liability are reported as deferred outflows of resources.

# E. Assets, Liabilities and Net Position or Equity (continued)

# 8. Compensated Absences

It is the City's policy to pay employees for unused vacation when there is a separation from service. Accumulated sick pay does not vest and is not paid upon termination.

Leave benefits are accrued when incurred in the government-wide and proprietary fund statements as these amounts will be paid to employees upon termination or retirement. A liability for compensated absences is reported in governmental funds only if they have matured, for example, as a result of employee resignations or retirements. All compensated absence liabilities include salary-related payments, where applicable.

# 9. Long-Term Obligations

In the government-wide financial statements and proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities or proprietary fund type statement of net position. Bond premiums and discounts are deferred and amortized over the life of the bonds using the straight-line method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are expensed when incurred.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received are reported as debt service expenditures.

# 10. Fund Net Position or Equity

Fund equity at the governmental fund reporting level is classified as "fund balance." Fund equity for all other reporting is classified as "net position."

Fund Balance - Generally, fund balance represents the difference between the current assets and current liabilities. In the fund financial statements, governmental funds report fund classifications that comprise a hierarchy based primarily on the extent to which the City is bound to honor constraints on the specific purposes for which amounts in those funds can be spent. Fund balances are classified as follows:

- Nonspendable Fund balances are reported as nonspendable when amounts cannot be spent because they are either (a) not in spendable form (i.e. items that are not expected to be converted to cash) or (b) legally or contractually required to be maintained intact.
- Restricted Fund balances are reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by the City or through external restrictions imposed by creditors, grantors, or laws and regulations of other governments.
- Committed Fund balances are reported as committed when they can be used only for specific
  purposes pursuant to constraints imposed by formal action of the City Council through the
  adoption of a resolution. The City Council also may modify or rescind the commitment.

# E. Assets, Liabilities and Net Position or Equity (continued)

# 10. Fund Net Position or Equity (continued)

- Assigned Fund balances are reported as assigned when amounts are constrained by the City's
  intent to be used for specific purposes, but are neither restricted or committed. Assignment of
  funds requires a simple majority vote of City Council.
- Unassigned Fund balances are reported as assigned as the residual amount when the balances
  do not meet any of the above criterion. The City reports positive unassigned fund balance only
  in the general fund. Negative unassigned fund balances may be reported in all funds.

Flow Assumptions - When both restricted and unrestricted fund balances are available for use, it is the City's policy to use restricted fund balance first, then unrestricted fund balance. Furthermore, committed fund balances are reduced first, followed by assigned amounts, and then unassigned amounts when expenditures are incurred for purposes for which amounts in any of those unrestricted fund balance classifications can be used.

Net Position - Net position represents the difference between assets and liabilities. Net investment in capital assets, consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for the acquisition, construction or improvement of those assets. Net position is reported as restricted as described in the fund balance section above. All other net position is reported as unrestricted.

The City applies restricted resources first when an expense is incurred for which both restricted and unrestricted net position are available.

# 11. Operating Revenues and Expenses

Proprietary funds distinguish operating revenues and expenses from nonoperating revenues and expenses. Operating revenues are those revenues generated directly from the primary activity of the proprietary fund. For the City, these revenues are charges for services for the use of the water and solid waste programs. Operating expenses are necessary costs incurred to provide the goods or services that are the primary activity of each fund. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses, including investment earnings, interest expense, and the gain or loss on the disposition of capital assets.

## 12. Pensions

For purposes of measuring the net pension liability and deferred outflows/inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the City of Brooklet, Georgia's Municipal Employees Benefit System (GMEBS) plans and additions to/deductions from the Plan's fiduciary net pension have been determined on the same basis as they are reported by GMEBS. For this purpose, benefit payments are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

# E. Assets, Liabilities and Net Position or Equity (continued)

# 13. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosures of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenditures/expenses during the reporting period. Accordingly, actual results could differ from those estimates.

# 14. Comparative Data

Comparative total data for the prior year has been presented only for individual funds in the fund financial statements and schedules in order to provide an understanding of the changes in financial position and operations of these funds. Also, certain amounts presented in the prior year data have been reclassified to be consistent with the current year's presentation.

# Note 2. Stewardship, Compliance and Accountability

# A. Budgetary Information

The City adopts an annual operating budget for all governmental funds except the capital projects funds, which have an adopted project budget. The budgets are adopted on a basis consistent with GAAP, except that no provision is made to reserve for encumbrances. All annual appropriations lapse at fiscal year end.

The City's budgetary process requires that expending agencies and department heads submit appropriation requests to the City Clerk. After review by the City Clerk, the requests are combined and an operating budget is submitted to the City Council prior to June for the fiscal year commencing the following July 1. Once received by the City Council, public hearings are advertised and conducted at City Hall to obtain taxpayer comments. Prior to July, the budget is legally enacted through passage of an ordinance. The final budget can be amended by the City Council throughout the year.

During the fiscal year ended June 30, 2017, City Council approved a budget amendment which decreased General Fund Expenditures by \$212,060.

The legal level of budgetary control is the department level.

The City does not use encumbrance accounting, whereby commitments for goods and services at the end of the year are recorded as encumbrances for budgetary control.

# B. Excess of Expenditures over Appropriations

In governmental funds, operating expenditures exceeded the budget as follows:

General Fund

General city government: Administration \$ 18,696
Public works: Streets \$ 50,162

# Note 3. Detailed Notes on All Funds

# A. Deposits and Investments

At June 30, 2017, the carrying amount of the City's deposits was \$458,289 which is reflected as cash of \$458,289. The related bank balance was \$473,054. Of this bank balance, \$257,028 was FDIC insured. The uninsured portion was collateralized at 110% with State or U.S. Government securities held by a third party.

## B. Receivables

Receivables at June 30, 2017, including the applicable allowance for uncollectible accounts, consisted of taxes, interest, accounts (billings for user charges) and intergovernmental receivables arising from grants.

Property taxes at June 30, 2017 consist of the following:

| Taxes receivable -                        | Current<br>Prior | \$<br><br>3,440<br>20,622 |
|---|------------------|---------------------------|
| Gross receivables<br>Allowance for uncoll | ectible accounts | 24,062<br>3,476           |
| Total                                     |                  | \$<br>20,586              |

Other receivables at June 30, 2017, consisted of the following:

|   | Gen | eral Fund | Er         | terprise        | Total |                 |  |
|---|-----|-----------|------------|-----------------|-------|-----------------|--|
| Intergovernmental receivables                 | \$  | 6,261     | \$         |                 | \$    | 6,261           |  |
| Other receivables                             | W 2 | 11,164    |            | 36,696          |       | 47,860          |  |
| Gross receivables Allowance for uncollectible |     | 17,425    | lance at a | 36,696<br>4,644 |       | 54,121<br>4,644 |  |
| Total   | \$  | 17,425    | \$         | 32,052          | \$    | 49,477          |  |

Other receivables in the General Fund consist primarily of franchise taxes, local option sales taxes and alcoholic beverage taxes.

# C. Property Taxes

Property taxes are levied on October 20, based on the assessed value of property as listed on the previous January 1 and are due December 20. On December 21, the bill becomes delinquent and interest may be assessed by the government. Penalties may be assessed 30 days after that date.

At the fund reporting level, if delinquent taxes are not paid within 60 days of year-end, they are recorded as deferred revenue since they are not available to finance current expenditures. The City has adopted the policy of writing off all taxes receivable over seven years old.

# D. Capital Assets

Capital asset activity for the year ended June 30, 2017 was as follows:

|   | Balance<br>June 30, 2016                   | Additions                            | Retirements | Balance<br>June 30, 2017                   |
|---|--|--------------------------------------|-------------|--|
| Governmental Activities:  |  |                                      |             |  |

| Transfers from: Governmental funds: |                 |                    |                    |            |  |  |  |  |
| General Fund                        | \$ -            | \$ 400             | \$ 13,959          | \$ 14,359  |  |  |  |  |
| Total governmental funds            | Nil             | 400                | 13,959             | 14,359     |  |  |  |  |
| Proprietary funds:                  |                 |                    |                    |            |  |  |  |  |
| Water Fund                          | 119,909         |                    |                    | 119,909    |  |  |  |  |
| Total proprietary funds             | 119,909         | Nil                | Nil                | 119,909    |  |  |  |  |
| Total                               | \$ 119,909      | \$ 400             | \$ 13,959          | \$ 134,268 |  |  |  |  |

Amounts transferred to the General Fund from the Water Fund represent amounts transferred to cover operating shortfalls. Amounts transferred to the Sanitation Fund from the General Fund represent net cash transactions of the Sanitation Fund which were deposited into or paid from the General Fund. Amounts transferred to the Cemetery Fund from the General Fund represent insurance amounts allocated to the Cemetery Fund which were paid from the General Fund.

# F. Long-Term Debt

# 1. Changes in Long-Term Debt

Transactions for the year ended June 30, 2017 are summarized as follows:

|  | Balance<br>June 30, 2016 |                 | Additions |        | Retirements |          | Balance<br>June 30, 2017 |                 | Amounts Due Within One Year |            |
|--|--------------------------|-----------------|-----------|--------|-------------|----------|--------------------------|-----------------|-----------------------------|------------|
| Governmental Activities:<br>Net pension liability<br>Compensated absences  | \$                       | 15,507<br>6,094 | \$        | 17,755 | \$          | -<br>339 | \$                       | 33,262<br>5,755 | \$                          | -<br>1,151 |
| Total governmental activities  |                          | 21,601          |           | 17,755 |             | 339      |                          | 39,017          |                             | 1,151      |
| Business-Type Activities:<br>Net pension liability<br>Compensated absences |                          | 2,600<br>670    |           | 2,977  |             | -<br>45  |                          | 5,577<br>625    | W<br>20                     | -<br>125   |
| Total business-type activities   |                          | 3,270           |           | 2,977  |             | 45       |                          | 6,202           |                             | 125        |
| Total  | \$                       | 24,871          | \$        | 20,732 | \$          | 384      | \$                       | 45,219          | \$                          | 1,276      |

The compensated absences liability will be paid from the proprietary fund from which the employee's salaries are paid. Compensated absences for governmental activities will be paid from the General Fund.

# G. Pension Plan

# 1. Plan Description

The City, as authorized by the City Council, has established a defined benefit pension plan (The City of Brooklet Retirement Plan) covering all full-time employees. The City's pension plan is affiliated with the Georgia Municipal Employees Benefits System (GMEBS), an agent multiple-employer plan administered by the Georgia Municipal Association. Contributions made by the City are commingled with contributions made by other members of GMEBS for investment purposes. The City does not own any securities on its own. Investment income from the securities is allocated on a pro rata basis. The Georgia Municipal Association issues a publicly available financial report that includes financial statements and required supplementary information for GMEBS. That report may be obtained by writing to the Georgia Municipal Association, Risk Management and Employee Benefit Services, 201 Prior Street, SW, Atlanta, Georgia 30303 or by calling (404)688-0472.

As provided by state law, benefit provisions for participants in GMEBS are established and amended by the respective employers. As authorized by City Council, the plan provides pension benefits and death and disability benefits for plan members and beneficiaries. All full-time employees are immediately eligible to participate. Benefits vest after 10 years. Members with 10 years of total service are eligible to retire at age 55 with reduced retirement benefits. Members with five years of total service are eligible to retire at age 65 with full retirement benefits.

Plan Membership. At January 1, 2017, the date of the most recent actuarial valuation there were 19 participants consisting of the following:

| Retirees and beneficiaries currently receiving benefits   | 4  |
|---|----|
| Terminated vested participants not yet receiving benefits | 2  |
| Active employees - vested                                 | 2  |
| Active employees - nonvested                              | 11 |
| Total   | 19 |

Contributions. Participating employees are not required to contribute to the plan. The City is subject to the minimum funding standards of the Georgia Public Retirement Systems Standards law (Georgia Code Section 47-20-10). The Board of Trustees of GMEBS has adopted a recommended actuarial funding policy for the plan which meets state minimum requirements and will accumulate sufficient funds to provide the benefits under the plan. The funding policy for the plan is to contribute an amount equal to or greater than the recommended contribution described below. For 2017, the actuarially determined contribution rate was 4.30% of covered payroll. For 2017, the City's contribution to the Plan was \$17,637.

# 2. Net Pension Liability

Effective July 1, 2014 the City implemented the provisions of GASB Statement No. 68, Accounting and Financial Reporting for Pensions - an amendment of GASB Statement No. 27, which significantly changed the City's accounting for pension amounts. The information disclosed below is presented in accordance with this new standard.

The City's net pension liability was measured as of September 30, 2016. The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of January 1, 2017 with update procedures performed by the actuary to roll forward to the total pension liability measured as of September 30, 2016.

# G. Pension Plan (continued)

Actuarial Assumptions. The total pension liability in the January 1, 2017 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

| Inflation                 | 3.25 % |
|---------------------------|--------|
| Salary increases          | 3.75 % |
| Investment rate of return | 7.75 % |

Mortality rates for the January 1, 2017 valuation were based on the RP-2000 Combined Healthy Mortality Rates with sex-distinct rates, set forward two years for males and one year for females.

The actuarial assumptions used in the January 1, 2017 were based on the results of an actuarial experience study for the period January 1, 2010 - June 30, 2014.

The salary increase assumptions range from 3.75% to 8.75% and include an inflation assumption of 3.25%. Cost of living adjustments were not applicable.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of September 30, 2016 are summarized in the table below:

|                       | TargetAllocation | Long-Term Expected Real Rate of Return |
|-----------------------|------------------|--|
| Domestic equity       | 45 %             | 6.75 %                                 |
| International equity  | 20 %             | 7.45 %                                 |
| Real Estate           | 10 %             | 4.55 %                                 |
| Global fixed income   | 5 %              | 3.30 %                                 |
| Domestic fixed income | 20 %             | 1.50 %                                 |
| Total                 | 100 %            |  |

Discount Rate. The discount rate used to measure the total pension liability was 7.75%. The discount rates did not change since the prior measurement date. The projection of cash flows used to determine the discount rate assumed that City contribution will be made at contractually required rates, actuarially determined. Based on those assumptions, the Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore the long-term expected rate of return on Plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

The required schedule of changes in the City's net pension liability and related ratios immediately following the notes to the financial statements presents multiyear trend information about whether the value of plan assets is increasing or decreasing over time relative to the total pension liability.

Changes in the Net Pension Liability of the City. Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of events far into the future, and actuarially determined amounts are subject to continual revision as results are compared to past expectations and new estimates are made about the future. Actuarial calculations reflect a long-term perspective. Calculations are based on the substantive plan in effect as of September 30, 2016.

Sensitivity of the Net Pension Liability to Changes in the Discount Rate. The following presents the net pension liability of the City, calculated using the discount rates of 7.75%, as well as what the City's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (6.75%) or 1 percentage point higher (8.75%) than the current rate.

# G. Pension Plan (continued)

# 4. Pension Expense and Deferred Outflows / Inflows of Resources Related to Pensions

For the year ended June 30, 2017, the City recognized pension expense of \$4,502. At June 30, 2017, the City reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

|  | Ou  | eferred<br>tflows of<br>sources | lr | Deferred<br>offlows of<br>esources |
|--|-----|---------------------------------|----|------------------------------------|
| Differences between expected and actual experience                               | \$  | 27,833                          | \$ | (16,775)                           |
| Changes in assumptions   |     | 11,211                          |    | (303)                              |
| Net difference between projected and actual earnings on pension plan investments |     |                                 |    | (11,576)                           |
| City contributions subsequent to the measurement date                            | F = | 10,042                          |    |                                    |
| Total  | \$  | 49,086                          | \$ | (28,654)                           |

City contributions subsequent to the measurement date of \$10,042 are reported as deferred outflows of resources and will be recognized as a reduction of the net pension liability in the fiscal year ending June 30, 2018. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

| Year | ending | June 30 |  |
|------|--------|---------|--|
|------|--------|---------|--|

| 2018  | \$<br>(10,345) |
|-------|----------------|
| 2019  | 6,733          |
| 2020  | 8,687          |
| 2021  | 1,699          |
| 2022  | 3,616          |
| Total | \$<br>10,390   |

# H. Equity

Net position on the government-wide statement of assets as of June 30, 2017, are as follows:

|   | Activities                   | siness-Type<br>Activities  | Total                        |
|---|------------------------------|----------------------------|------------------------------|

| Total restricted net position            |               | \$      | 19,509                   | \$<br>_                | \$<br>19,509 |

## Note 4. Other Notes

# A. Risk Management

The City is exposed to various risks of losses related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters for which the City carries the following insurance coverages. There were no significant reductions of insurance coverage compared to the prior year. Settled claims have not exceeded the commercial excess coverage in any of the past three fiscal years.

The City has joined together with other municipalities in the state as part of the Georgia Interlocal Risk Management Agency (GIRMA), a public entity risk pool currently operating as a common risk management and insurance program for member local governments. The amount of insurance coverage has been adequate over the last three fiscal years to cover any settlements. The City is required to pay all premiums, applicable deductibles and assessments billed by GIRMA. The City is also responsible for following loss reduction and prevention procedures established by GIRMA and reporting as promptly as possible, and in accordance with any coverage descriptions issued, all incidents which could result in the funds being required to pay any claim of loss. GIRMA's responsibility includes paying claims and representing the City in defense and settlement of claims within the scope of loss protection furnished by the funds. GIRMA's basis for estimating the liabilities for unpaid claims is "IBNR" established by an actuary. The City has not compiled a record of the claims paid up to the applicable deductible for the prior year or the current fiscal year. The City is unaware of any claims for which the City is liable (up to the applicable deductible) which were outstanding and unpaid at June 30, 2017. No provisions have been made in the financial statements for the year ended June 30, 2017 for any estimate of potential unpaid claims.

The City has elected to be a member of the Georgia Municipal Association Workers' Compensation Self-Insurance Fund (GMAWCSIF), a risk management agency created under Georgia law. As a participant in the GMAWCSIF, the City has no obligation to pay its own workers' compensation claims. The City is required to make an annual contribution to the fund in an amount that is determined on the basis of actuarial projections of losses. With payment of the City's annual contribution, the City has effectively transferred the risk and responsibility for payment of its workers' compensation claims. However, the enabling statute creating the GMAWCSIF permits the fund to levy an assessment upon its members to make up any deficiency the fund may have in surplus or reserves. No amount has been recorded in the financial statements for this contingency as management believes the likelihood for assessment is remote.

The City pays unemployment claims to the Georgia Department of Labor on a reimbursement basis. Liabilities for such claims are immaterial and are not accrued.

# B. Contingencies and Pending Litigation

At the date of this report, no litigation, claims or contingencies are pending.

<sup>\* 2017</sup> Information will be determined after fiscal year end and will be included in the 2016 valuation report

# Notes to schedule of Contributions:

Valuation Date: The actuarially determined contribution rate was determined as of January 1, 2017, with an interest

adjustment to the fiscal year. Contributions in relation to this actuarially determined contribution rate will be

reported for the fiscal year ending June 30, 2018.

Methods and assumptions used to determine contribution rates

Actuarial cost method Projected Unit Credit

Amortization method Closed level dollar for remaining unfunded liability

Remaining amortization period Remaining amortization period varies for the bases, with a net effective amortization period of 10 years

Asset valuation method Sum of actuarial value at beginning of year and the cash flow during the year plus the assumed investment

return, adjusted by 10% of the amount that the value exceeds or is less than the market value at the end of

the year. The actuarial value is adjusted, if necessary, to be within 20% of market value.

Actuarial Assumptions:

Net Investment Rate of Return 7.75%

Projected salary increases 3.25% plus service based merit increases

Cost of Living Adjustments 0.00%

Retirement Age Normal retirement age is 65 with 5 years of service; early retirement age is 55 with 10 years of service.

Changes in methods and assumptions:

As a result of the new administrative fee structure approved by the Board, the administrative expense assumption was updated for fiscal years beginning in 2016.

Benefit Changes: There were no changes in benefit provisions in the last two fiscal years.

The schedule will present 10 years of information once it is accumulated.

For information regarding assumptions and amortization methods, see Note 3.G.

TERRELL T. REDDICK 1947-2005 JAMES S. RIGGS PATRICIA H. HUNTER

# INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Mayor and City Council City of Brooklet, Georgia Brooklet, Georgia

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, each major fund and the remaining fund information of the City of Brooklet, Georgia as of and for the year ended June 30, 2017, and the related notes to the financial statements, which collectively comprise the City's basic financial statements and have issued our report thereon dated November 2, 2017.

# Internal Control over Financial Reporting

In planning and performing our audit, we considered the City of Brooklet, Georgia's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City of Brooklet, Georgia's internal control. Accordingly, we do not express an opinion on the effectiveness of the City of Brooklet, Georgia's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of the internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. We did identify certain deficiencies in internal control, described in the accompanying schedule of findings and questions costs as Findings 2017-003 through 2017-007 that we consider to be material weaknesses.

# Compliance and Other Matters

As part of obtaining reasonable assurance about whether the City of Brooklet, Georgia's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our test disclosed instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* and which are described in the accompanying schedule of findings and questioned costs as Finding 2017-001 through 2017-002.

# City of Brooklet, Georgia's Response to Findings

The City of Brooklet, Georgia's response to the findings identified in our audit is described in the accompanying schedule of findings and questioned costs. The City of Brooklet, Georgia's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

# Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed with Government Auditing Standards in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Reddick, Riggs and Hunter, P. C.

Statesboro, Georgia November 2, 2017

# CITY OF BROOKLET, GEORGIA Schedule of Findings and Questioned Costs June 30, 2017

## SECTION 1 - SUMMARY OF AUDITORS' RESULTS

# Financial Statements

Type of auditors' report issued:

Unmodified

Internal control over financial reporting:

Material weaknesses identified?

Yes

Significant deficiencies identified?

None Reported

Noncompliance material to the financial statements noted?

Yes

Finding 2017 - 001:

Criteria: Federal and state payroll tax regulations establish the City's required deposit schedule for payroll taxes.

Condition: During the year ended June 30, 2017, we noted numerous instances in which tax deposits were made

late.

Context: For the City's required semi-weekly deposits for federal taxes, we noted eight instances in which the

deposits were not made timely. For the City's required monthly state tax deposits, we noted four

instances in which the deposits were not made timely.

Cause: It appears that failure to make timely tax deposits was due to oversight on the part of the City Clerk.

Effect: Because of the late tax deposits, the City has been assessed penalties. While some of these penalties

were caused by the actions of the prior City Administrative Assistant, a substantial portion was caused by late tax deposits in the current year. Total penalties assessed for the period were approximately

\$3,800.

Recommendation: We recommend that the importance of complying with required deposits in a timely manner be

emphasized with appropriate personnel.

Comments: The City concurs with the finding. The City Administrator has made the payroll taxes an internal part of

the payroll for each week and payroll checks do not leave her office until payroll taxes are paid and

journal entries made.

# Schedule of Findings and Questioned Costs

# Finding 2017 - 002:\*

Criteria: State law requires municipalities to annually adopt a balanced budget for the general fund, special

revenue funds and debt service funds. Once adopted, these budgets act as legal spending authorizations

or appropriation limits.

Condition: During the year ended June 30, 2017, the general fund and the street department expended amounts

which exceeded appropriations.

Context: Total Administrative expenditures exceeded the approved budget by \$18,696 and the street department

exceeded the approved budget by \$50,162.

Cause: During the year, the City used its reserves to purchase property and incurred additional salary expense,

as well as increased employee health insurance.

Effect: While the City did prepare a budget amendment to include these items, the Administrative department

and Street departments exceeded their budget due to higher than anticipated salaries and capital outlay,

respectively.

Recommendation: We recommend that in future years, budget amendments be adopted to reflect major items which were

not anticipated when the original budget or prior amendments were adopted.

Comments: The City Concurs with the findings. Since the budget amendments are controlled by enacting an

ordinance by the City's Charter which takes up to two (2) months to complete, the City is working with the City Attorney to have their Charter changed to have the amendments enacted by a resolution, which will be a much quicker and easier procedure. Also, the City Administrator and Council member who supervises the Administrative/Financial Department have created a budgetary procedure in-house to

make sure each budgetary list item is checked each month at month end.

# Finding 2017 - 003:

Criteria: An essential element of the decision-making process for Council is the accuracy of financial information

which can be relied upon.

Condition: During the year ended June 30, 2017, we noted a number of instances in which transactions were

recorded incorrectly

Context: We noted 28 instances in which deposits to the City's general fund bank account were incorrectly

recorded as credits to cash, incorrectly reducing the cash balance, or items such as tax deposits were

incorrectly recorded as debits to cash, incorrectly increasing the cash balance.

Cause: It appears that the failure to correctly record these transactions was due to a lack of understanding on the

part of the City Clerk.

Effect: While the errors were eventually detected and corrected near year end, the errors significantly increased

the difficulty of reconciling the City's bank accounts and resulted in inaccurate financial reports during

the year.

Recommendation: We recommend that memorized journal entries or journal entry worksheets be used as much as possible

to avoid such errors.

Comments: The City concurs with the finding. The City Clerk has created journal entry worksheets to be used as

much as possible when entering journal entries.

# Schedule of Findings and Questioned Costs

# Finding 2017 - 004:

Criteria: As noted above, an essential element of the decision-making process for Council is the accuracy of

financial information which can be relied upon.

Condition: During the year ended June 30, 2017, we noted a number of instances in which transactions to the same

vendor were recorded inconsistently.

Context: The City's payments to the vendor who handles garbage collection were coded to five different

expenditure/expense accounts across three funds. In addition, the City's retirement payments were inconsistently coded, with some payments being allocated to all departments, while other payments were

coded fully to the administration department.

Cause: It appears that the failure to correctly record these transactions was due to a lack of understanding on the

part of the City Clerk.

Effect: The failure to accurately record expenditures caused inaccurate monthly financial statements to be

presented to Council.

Recommendation: We recommend that greater care be exercised in recording recurring expenditures/expenses and that the

correct distribution for each vendor be noted in the vendor file.

Comments: The City concurs with the findings. The importance of accuracy has been reviewed with personnel

responsible for accounts payable.

# Finding 2017 - 005:

Criteria: An important control over accounts receivable, to include taxes and utilities, is adequate control over

account adjustments.

Condition: During the year ended June 30, 2017, we noted an instance in which a tax account with a balance of

\$10,208.46 was written off with no supporting document to substantiate the write-off.

Context: While appropriate documentation was received from the County tax assessor for the other tax

adjustments which were selected for testing, no such documentation could be located for the account in

question.

Cause: It appears that lack of documentation was oversight on the part of the tax clerk.

Effect: Because the tax clerk handles billing of taxes as well as collection of money, account adjustments could

be used to compensate for misappropriation of cash receipts.

Recommendation: We recommend that all account adjustments be reviewed and approved by the City Administrator for

appropriateness and that the review be documented on by the Administrator's initial and date on the

documents.

Comments: The City concurs with the findings. The City Administrator and Tax Clerk has created a checks and

balances procedure in house before any adjustments can be made unless otherwise approved by the

appropriate level of management.

# Schedule of Findings and Questioned Costs

Finding 2017 - 006:\*

Criteria: An important control over the City's accounting system is an accurate filing system for the related

supporting documents.

Condition: During the year ended June 30, 2017, we noted several instances in which supporting documentation for

transactions could not be located. We also noted several instances in which duplicate payments were issued

for the same invoice.

Context: We noted a number of instances in which invoices for various disbursements could not be located and had

to be either searched for or duplicates obtained. Further, we noted several instances in which invoices

could not be located at all.

Cause: It appears that several of the missing invoices were from the portion of the year in which the previous City

Administrative Assistant was responsible for accounts payable. However, we noted that invoices in many

cases were maintained in baskets which had not been filed.

Effect: While we were ultimately able to locate most of the invoices, and all payments appeared to be for

appropriate expenditures, the inability to locate invoices caused difficulty and increased time to research transactions. The inability to review the prior invoices paid to a vendor could cause duplicate payments to

vendors.

Recommendation: We recommend that the importance of accurate and timely filing be emphasized with appropriate personnel.

Comments: The City concurs with the findings. The City Administrator has created a filing system in office to account

for all invoices and payments month by month instead of by vendor.

Finding 2017 - 007:

Criteria: An important control over cash disbursements is control over access to the City's accounts.

Condition: We noted several accounts for which the authorized signatures were those of the prior mayor and prior

administrative assistant.

Context: We noted that the authorized signatures for all of the City's certificates of deposit were incorrect.

Cause: It appears that the certificates were initially issued during the tenure of the previous mayor and

administrative assistant and that the accounts have never been updated.

Effect: Inappropriate signatures exposes the City to the risk that the certificates would be improperly released to

those signers.

Recommendation: We recommend that the bank be notified immediately that these accounts are incorrect and that the

signatures be corrected on the next renewal date for these certificates.

Comments: The City concurs with the findings. The City is working with the bank to have the signatures of the prior

Mayor and City Clerk removed as soon as possible and the new Mayor, City Clerk and Administrative

Supervisor added.

<sup>\*</sup> Indicates uncorrected prior year finding
